

WS-8215

Full-Range Loudspeaker

The model WS-8215 speaker has great sound and massive full-range performance in a simple floor stand speaker system.

Congratulation &
Thank You for
Purchasing
Nissindo
Products!

Designed for Professional Performance

Designed to bring down the house, no matter what size venues you play. Their rugged design lets you stack, pack or fly any way you want. Cabinets also incorporate karaoke speaker protection which virtually eliminates blown speakers.

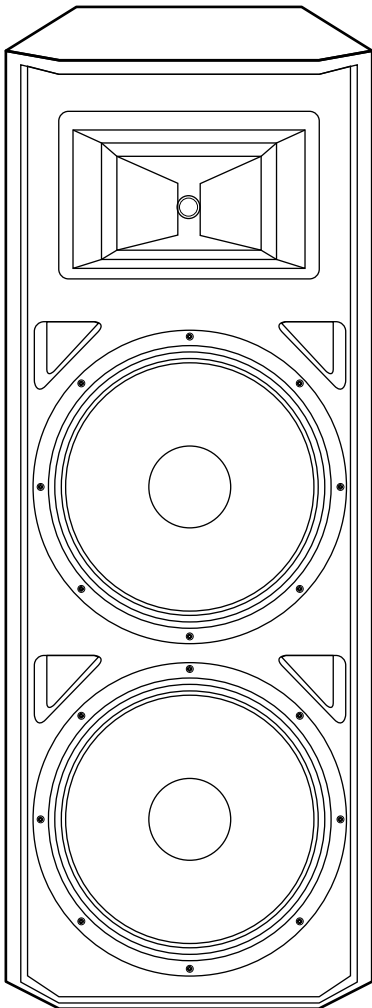

Unique Sound Effect

Combining power amps with substantial headroom and speakers with appropriate power ratings results in crystal clear sound with enough punch to move any dance floor even at home entertainment. These critical components shape your sound and add life to your performance.

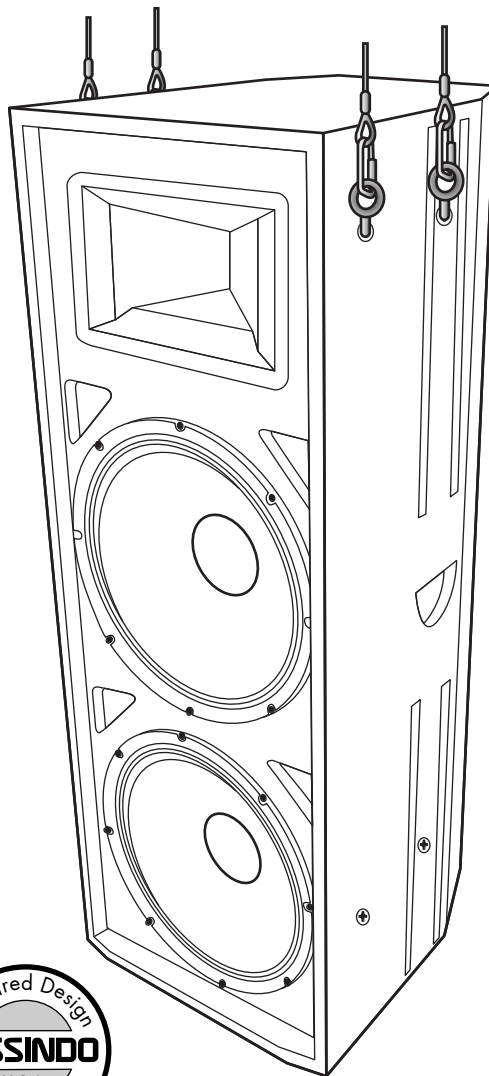

That's more to your sound than just high and low frequencies. When two speakers try to do three jobs, the result is often less than stellar Nissindo pro. line loudspeakers with high-efficiency 3-way enclosures that offer a

number of benefits that 2-way design simply cannot deliver. Our Nissindo WS series have a dedicated speaker optimized for exceptional midrange resolution and detail. This specialized speaker delivers mids much more accurately than the woofers used in most 2-way design. And since the woofer doesn't need to reproduce mid/high frequencies, it produces deeper, more accurate bass without sacrificing sound quality. Your highs and mids have never been so clear and your bass has never thumped like this before. This speaker Nissindo WS-8215 is designed by the engineering team of Nissindo.

Two types of speaker terminal: phone jack 1/4 and parallel 4-pins Neutrik Speakon connectors.

Service

An appliance and cart combination should be move with care. Quick stops, excessive force and uneven surfaces may cause the appliance and cart combination to overturn.

Servicing

Do not attempt to service the set yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Replacement parts

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original parts. Unauthorized substitutions may result in fire, electric shock, or other hazards.

Safety check

Upon completion of any service or repairs to the set, as the service technician to perform routine safety checks (as specified by the manufacturer) to determine that the set is in safe operating condition.

If the set does not operate normally when following the operating instructions. Adjust only those controls that are specified in the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the set to normal operation.

When the set exhibits a distinct change in performance - this indicates a need for service.

If the set has been subject to excessive shock by being dropped, or the cabinet has been damaged.

If liquid has been spilled or objects have fallen into the set.

Specifications

Speaker Type	Loud Speaker	Sensitivity	99 dB
Woofers Size	Dual 15"	High Frequency Drivers/Exit	1" Neodymium
Voice Coil Dia.	1.5"	Horn Dispersion.....	90 x 40 Cons. Dir
Input Impedance.....	8 ohms	Dimensions (WxHxD).....	17.7x46.9x19.7 inches
Frequency Response	40 Hz~20 kHz	Net Weight (Without Package).....	105 lbs
Power Rating	800W RMS (8ohms)	Shipping Weight.....	110 lbs
